7Summits
Product Development Intern
June 2019 - August 2020

- Worked closely with the lightning web component development team as a front end developer, creating multiple web components.
- Put my coding skills to the test for the first time in a real world working environment.
- Published three LWC components on Salesforce appexchange.

Bradley University Tech Crew
Equipment Manager
April 2018 - May 2021

- Tech Crew was an organization on campus that was responsible for running lighting and sound equipment for on-campus events i.e. concerts, comedians, ect.
- As equipment manager, I was responsible for making equipment acquisitions as well as maintaining functionality of every item.

JTS Pools
Pool Team Manager
May 2018 - August 2018

- Managed a team that installed above-ground pools.

`</Experience>`

`<ClientWork>`

OFS Posture Application

- This project was a collaboration of which I had the opportunity of working with a physical therapist at OSF HealthCare. In this project, I was tasked with building a Bubble.io prototype.

Caterpillar Design Challenge

- The Caterpillar Design Challenge was an opportunity where I was asked to help redesign Caterpillar's dealership website.

Milieu Fermentation Project

- This is an ongoing side project where I am developing a website for a brewery out in Colorado.
